

Table S20. Multivariate Cox regression analysis for clinical recovery outcomes

Outcome	Adjusted hazard ratio (HR)	95% confidence interval (CI)	p-value
Fever Recovery	2.24	1.09-4.59	0.028
Febrile Neutropenia Recovery	2.35	1.17-4.73	0.017
ANC Recovery	2.10	1.01-4.36	0.047

Footnote:

"Adjusted for fungal infection, disease status, baseline ANC, and MDR infection. Analysis restricted to patients with high-risk hematologic disorders (n = 48)."
