

Supplementary Table 2. Kidney outcomes at last follow-up according to induction-phase acute kidney injury status

Group	No.	Final GFR (mL/min/1.73 m ²)	CKD present	CKD stage 2	CKD stage 3	Progressed from CKD stage 2 to 3
All patients	113	121 (99–141)	15	12	3	2
Induction AKI	49	116 (98–136)	9	7	2	1
No induction AKI	64	124 (104–148)	6	5	1	1

Values are presented as number or median (interquartile range).

GFR, estimated glomerular filtration rate; CKD, chronic kidney disease; AKI, acute kidney injury.
