

Supplementary Fig. 3. A representative result of focal onset ictal EEG segment annotation for the first seizure with a length of 67 seconds (the first 38 seconds is shown here) of the chb05 in the CHB-MIT dataset. A green-colored vertical dashed line represents a seizure onset. Yellow-colored boxes represent single-channel-level ictal EEG segments annotated by epileptologists. EEG, electroencephalography; CHB-MIT, Children's Hospital Boston-Massachusetts Institute of Technology.
