

Supplementary Fig. 4. A representative result of focal onset ictal EEG segment annotation for the first seizure with a length of 25 seconds of the SNUBH03 in the SNUBH dataset. Green- and red-colored vertical dashed lines represent a seizure onset and termination, respectively. Yellow-colored boxes represent single-channel-level ictal EEG segments annotated by epileptologists. EEG, electroencephalography; SNUBH, Seoul National University Bundang Hospital.
